Technical Implementation and Support Specialist
Stouffville, ON

Front Rush - Software company providing athletics software solutions — May 2020 - Aug. 2020

- Handled live customer database using Microsoft SQL Server to effectively manage and solve data related issues
- Received an overall 98% satisfaction rating from customers by accurately resolving numerous support tickets
- Revamped frontend of company's website and admin site using JavaScript/HTML/CSS by translating wireframes
- Developed an announcement board web page to educate customers and increase customer retention by 50%
- Discovered a critical data sync bug in the mobile application which had affected multiple clients for over 10 years

Taekwondo Instructor
Markham, ON

Master Teo's Taekwondo — Jan. 2017 - Jun. 2019

- Led hourly long classes with over 20 students to ensure they learned patterns and techniques with confidence
- Refereed in-class sparring matches to administer the rules and enforce sportsmanship among all competitors

Projects ›

Inventory Management

inv-management.herokuapp.com

- Built a full-stack PERN (PostgreSQL, Express, React, Node) application for managing and tracking equipment
- Developed a RESTful API using Express to perform HTTP requests on item and order information
- Implemented search functionality, ability to merge duplicate orders, and normalized relational database
- Used Material-UI components to assist in frontend development and enhance the overall user experience

Popcorn Movies

the-popcorn-movies.herokuapp.com

- Developed a website to search, read plot summaries, and view trailers of movies using VanillaJS, HTML/CSS
- Leveraged external APIs from Open Movie Database, New York Times, and Youtube to obtain movie information
- Used CSS flexbox and grid layouts to improve the user interface and assist in mobile responsiveness

Word Search

- Built a word search game using Pygame that dynamically generates a random word bank and board each time
- Implemented a resizeable board with variable dimensions and ability to reveal words from the word bank

Dodge Master

- Utilized object oriented programming to build an endless dodging game with Java Swing
- Constructed a collision detection engine for player and bouncing blocks

Education ›
